² Represents non-recourse secured debt obligations, deferred acquisition fee installments (including interest) and the annual distribution and shareholder servicing fee liability.

Dear Fellow Investors,

As of December 31, 2019, our portfolio comprised 66% net lease, 29% self-storage and 5% student housing properties. Our net lease portfolio was composed of full or partial ownership interests in 47 properties, substantially all of which were fully occupied, totaling 9.6 million square feet and triple-net leased to 61 tenants. The remainder of our portfolio at year-end was composed of 5.5 million square feet of full or partial ownership in 68 self-storage properties. 12 student housing development projects and two student housing operating properties.

Approximately 98% of our net leases include built-in contractual rent escalations, with more than half tied to the Consumer Price Index (CPI) or similar indices.

Strategic Dispositions

In what continued to be a highly competitive investment market, our proactive asset management has been a key differentiator, enabling us to identify additional opportunities to position the portfolio for longer-term growth and value creation. In 2019, we sold the 11 properties in our U.K. trade counter industrial portfolio for total proceeds of \$39 million, net of closing costs, and recognized an aggregate gain on sale of \$10 million. In January 2019, we also sold our final multifamily residential property, completing our 2018 decision to exit the sector and redeploy the proceeds into our student housing assets, which we continue to view as a compelling opportunity to capitalize on the supply/ demand imbalance within the European market. Despite a \$19-million decline in total revenues compared with 2018 as a result of dispositions and foreign currency exchange rates, we benefited from an increase in operating property revenues driven primarily by the fullyear impact of two student housing operating properties placed into service in September 2018 and a subsequent student housing property in July 2019.

Student Housing Strategy

During 2019 we entered into a new student housing development project in Pamplona, Spain, for an estimated aggregate amount of \$30 million. To

capitalize on the value creation from the forthcoming completion of construction and the commencement of operations of our student housing investments, in 2019 we entered into an innovative framework agreement with Brookfield. The agreement provides that upon completion of each of our 11 student housing properties located in Spain and Portugal, Brookfield will enter into a 25-year triple-net lease agreement for each property. We believe the conversion of these operating properties into net lease assets provides for both operational efficiency and stable income from well-secured, long-term leases. The agreement also includes options for Brookfield to purchase all properties simultaneously for a fixed purchase price under certain conditions. As a result of this agreement, the student housing operating property located in Barcelona, Spain, that was placed into service during the third guarter of 2019

is now net leased to Brookfield. The remaining ten Iberian student housing projects under construction are scheduled for completion throughout 2020 and 2021.

Focus on Shareholder Value

Moving forward, our larger portfolio of assets is positioned to benefit from adjustable rents structured to keep pace with inflation by insulating our investors from the potential negative impact of an uncertain interest rate environment. Approximately 98% of our net leases include built-in contractual rent escalations, with more than half tied to the Consumer Price Index (CPI) or similar indices. Our operating properties, made up of selfstorage and student housing, are also well suited for rising-rate environments, giving us the ability to adjust rents as market conditions change.

With a focus on providing our investors with income, we have provided those who invested \$10,000 in Class A shares of CPA®:18 – Global at inception with a total of \$5,017³ in distributions declared. Those who invested \$10,000 in Class C shares of CPA®:18 – Global at inception have received a total of \$4,562³ in distributions declared.

Our estimated per share net asset value (NAV) as of December 31, 2019 based in part on appraisals conducted by independent third-party firm Robert A. Stanger & Company, Inc. — was \$8.94 per share for Class A and Class C common stock as compared with \$8.73 per share as of December 31, 2018.

In Closing

As I write this letter, I'd like to take a moment to acknowledge the COVID-19 pandemic that has caused significant uncertainty in the economic outlook and hardship among our shareholders. While we believe we are well positioned to weather the storm compared with most, we are monitoring our portfolio closely for any potential impact on our tenants and their businesses, as well as our valuation and our portfolio overall.

As always, we thank our Board of Directors for their valuable guidance as well as our team members for their unwavering commitment to the management of the CPA®:18 – Global portfolio. We also thank you, our shareholders, for your ongoing support, and we wish you and your families good health during this unprecedented time.

Best regards,

Jason E. Fox President and Chief Executive Officer

³ Assumes distributions declared and reinvested through December 31, 2019.

Portfolio Diversification

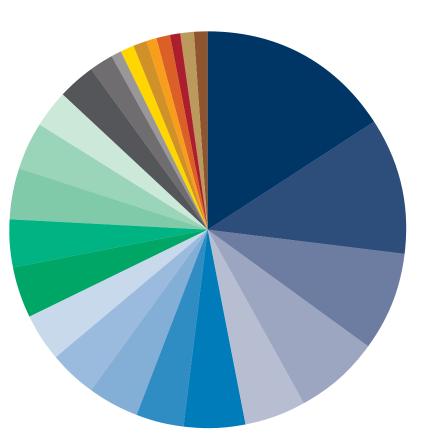

Geographic Diversification⁴
